

FIRST RESEARCH ON APPLIED BIOPHOTONS NOW COMPLETED!

© By Johan Boswinkel, Director, Institute of Applied Biophoton Sciences, Holland

The first scientific research on the application of biophoton therapy has been completed. On the 11th of December 2010 Masters degrees in Integrated Health Sciences were presented to 17 former students of the Health Angel Academy where they obtained their Bachelor's degree. They obtained their Masters Degree from the Inter-University College at the University of Graz in Austria. There are approximately 35 European Universities represented by this College. The studies have been a part of the Leonardo da Vinci project of the European Commission.

Biophotons, the Science Above All Sciences?

Biophotons are light and since light controls everything on this planet, the science of the biophotons might be called the science that stands above all other sciences. But where there is light there is life. Life is reality, where science is often not. It is done in a laboratory where all kinds of artificial conditions are maintained. Compared to other sciences, the biophoton sciences is really a non-science, because it seems that the biophotons are information packages that can have an immediate impact on all other information packages. In other words: billions of changes happen every split second. It means everything that everything is in a constant state of chaos. It is not an orderly world of science. But growth is only possible in chaos. And the desire of everything that is alive is to grow, so it has to be in chaos. Order brings everything to a stand still.

Biophotons are quality and in principle everything should be based on quality. If something is based on quality, then it can be used as foundation on which you can build. If there is no qualitative base, then one is building on quicksand and everything you put in it, will sink away. And at the centre of everything is always the human being, the being of light. That is why it is essential that this being has to be in optimum state. For that reason I started to develop this biophoton device, to bring the human being in optimum state, capable of many things, primarily to heal him or her self, again. I am so glad that

many hundreds of people have seen the light and perform as therapists and that tens of thousands of people have been healed of their chronic complaints. They have knowledge of the treatment and converted it into knowing by experiencing it.

I am very proud of my students that they have performed these studies and proven to the always skeptic world that it really works, and that the placebo effect is really not applicable since it also has been applied on seeds, neurons and milk.

Studies

The students researched a variety of subjects and they all used the same biophoton device, the Chiren. They proved scientifically that there were significant changes after treatment with the biophoton device.

The research was done using the object's (body, milk, neurons, seeds) OWN biophotons in a biofeedback loop via the Biophoton device, using only fiber optics. It was proven in all cases that with the biophoton treatment, using fiber optics, numerous functions improved. It was also proven that qualities of a material substance could be transferred to another medium by means of biophotons.

One of the theses focused on children with chronic complaints. Of 133 complaints 92,7% disappeared within a period of two weeks using the biophoton treatments.

Another research showed that cortical neurons of rats grew tremendously. They grew even more when the information of the homeopathic remedy *Cerebrum Compositum* (Heel) was used.

In the list below all the studies have been listed. They will soon all be published. The moment the publications can be ordered, it will be published on the website: www.biontology.com

Thesis subjects have been:

- Biophoton Therapy and Quality of Life of Children with chronic complaints and food hypersensitivities. by Wim Pet and Ellen Pet

- Health and Quality of Life of Clients with Random Complaints under treatment with Biophoton Therapy *by Anida Stremmelaar*
- Repeatability of Measurements using Biophoton Device J. Boswinkel *by Femke Ansems, Riek Servaas and Joop Muller*
- Biophoton Therapy and its perceptible effect on human blood *by Sjoerd Pet and Menno Pet*
- Effects of Biophoton Treatment on isolated rat cortical neurons, through the biophoton device according to J. Boswinkel *by Dietrich A. Vastenburg*
- The effect of biophoton intervention on the pH level of aging milk *by Paul Mak*
- Effects on the growth rate of tomato seedlings after treatment with biophoton device J. Boswinkel *by Wendy X. Boswinkel*
- Development of wheat seedlings and the attempt of non-molecular information transfer from gibberellic acid *by Gonda E.M. Wassenberg*
- Germination of wheat seedlings and treatment with a biophoton device according to J. Boswinkel influence of information from a growth hormone *by Wim Baars*
- Germination of wheat seedlings and treatment with Biophoton device according to J. Boswinkel – influence of information from an herbicide *by Bart Lely*

- Treatment with Biophoton Therapy and Health and Quality of Life of Clients with Random Complaints *by Ben Mikx*
- Health and Quality of Life of clients with random Complaints under treatment with biophoton Therapy, observational research using the SF 36 and a score card system *by Floris Blok* 🌸

ABOUT THE AUTHOR

Dr. Johan Boswinkel has investigated the biophotons since 1982. He never did much fundamental research but concentrated on applications. He started the Health Angel Academy and the Institute of Applied Biophoton Sciences where students from all backgrounds and from all over the world learn the techniques of performing "miracles" in the health field. Even the most chronic of health issues disappear by learning to read and correct the information that the body itself radiates.

**Sixty-percent of the immune system
is in the GUT!**
**While conventional medicine struggles
with MERSA and C. diff**
OUR tool box offers real solutions!

"Never have I seen a treatment of any modality render so much benefit to so many people."
Abram Ber, MD Explore! Vol 5 #1 1994.

"Dr Victoria Bowmann's methods are life altering!"
Robert Kaplan, MD

- 19 years of research with clinical application.
- Self-administered Reflorastation Kits
- 20 strains of probiotics (proprietary formula)
- 50 billion CFUs
- Single use - disposable
- Patients use in the privacy of their home.

Professional pricing: \$20 per kit - 5 kit minimum.
Shipping included with 10 kits.

Explore! Special Offer thru June 2011
\$17 per kit (10 kit minimum).

Free Copy of Dr Victoria Bowmann's book,
"You Gotta Have GUTS!"
plus CD included with first order.
